Tamil Nadu State Secondary School Education
GRADE – 95.60%

PROJECTS

Stonks (Ongoing)
🏆 This is my ongoing project doing with React as Frontend and Express, Mongodb as Backend. This is the game created for beginers to understand the Stock Market

Todo List
🏆 This project is done using android studio with java and XML for user interface. This app is used to maintain our day-to-day tasks or list everything that we have to do. We can get reminder as notification.

Exploiter
🏆 Exploiter is a multi-featured discord bot done using python and hosted in Replit. It is in more than 90 servers. With the help of this bot we can send animated emojis, embeds and we can translate message and so on. It also has a help command to understand the feature of this bot.

Plants vs Zombies API
🏆 An API built with with NextTS and Tailwind CSS to help website builders build their websites about Plants-vs-Zombies-2 easily!Plants vs Zombies API is deployed in Vercel. It does not require any API key.

SKILLS

HTML, Css, JavaScript,React   ●●●●○

Java, Python, MongoDB,PHP   ●●●○○

C,C++,SQL, Bash   ●●●○○
